

SKIDOME Ski & Board – Cleaning Gear & Safety Check

Do not use laundry Detergent.

Any type of fabric can become damaged from its contact with chloride salts (perspiration). Chloride salts, when left on a fabric, can bleed dyes, slowly discolor and eventually deteriorate a fabric. Do not store in unconditioned areas, Plastics can degrade with too much heat.

SKIS / BOARD

BATH TIME - Rinse with cold water, in the shower or by hose, then dry.

BINDINGS - Record DIN (binding setting) on a tag and attach to ski. Toe and Heal for each ski. Use a screwdriver to back off, reduce the setting to Zero

SCREWS - Tight

EDGES - Use ZARDOZ NOTwax with rust block, or wax on edges to protect, or coat with petroleum jelly. Do not store in humid damp area.

BOOTS

LINER BATH- Take out orthotics or foot bed, remove liners. Use cold water and fill up boot. Use a combination of oxy clean and borax in water. Rinse 3 times. Dry outside and use a hair dryer 2 times a day over multiple days to dry. Can take 4-6 days to dry.

SHELL - Wash with cold water

FUNK - Pick up OT Odor Spray. ODOR OUT or other sports spray designed for hockey pads.

Check for wear on buckles and straps, Cracks in the plastic, Treads worn
